Kayla Heady

(845)416-8903 | Kaylaheady1@gmail.com

Education

Florida State University - Tallahassee, FL
Major: Computer Programming with Applications Minor: Mathematics

Experience

Raide App
Product Designer **Feb 2024 - Current**

- Founding team engineer for a peer-to-peer clothing rental marketplace, now serving 17,000+ active users across 19 universities
- Designed and prototyped end-to-end product experiences in Figma, translating wireframes and interaction flows into production-ready UI components in React Native.
- Applied human-centered design principles by conducting user interviews, A/B testing, and behavioral analytics to refine flows for renting, listing, and messaging.
- Developed scalable backend services (Supabase, Node.js, PostgreSQL) supporting authentication, payments, and real-time updates—enabling a seamless, reliable UX.
- Implemented design-system patterns and reusable components to ensure visual consistency and accessibility across platforms.

Projects

Study Circle - Academic Project

- Developed a mobile app that matched students in the same class into study groups, implementing authentication, chat features, and matching logic with Supabase and Node.js.
- Implemented authentication and group chat features, enabling collaborative learning environments.
- Designed matching logic and database queries to automatically create and manage study groups.
- Applied full-stack development practices, reinforcing knowledge of data structures, algorithms, and real-time systems.

Skills

- Programming Languages & Frameworks: JavaScript, TypeScript, C++, Python, React Native, React.js, Node.js, Java, HTML
- DevOps & Deployment: Git, GitHub, Expo Go, Unix/Linux
- UX/UI & Tools: Figma, Wire framing, Prototyping
- Back-End & Databases: Supabase, PostgreSQL, APIs

Associations

- Gamma Phi Beta Sorority
- Association for Computing Machinery
- Women in Computer Science (WICS)

Certifications

- Google UX Design Professional Certificate
